Subject: [EXT] Extension Request - James Ranch Unit DI #2 (2RP-5194)

All,

XTO is requesting a second extension of the current deadline for submitting a remediation work plan or closure report required in 19.15.29.12.B.(1) NMAC at James Ranch Unit DI #2 (2RP-5194). The spill occurred January 4, 2019 and XTO began initial site assessment on March 20, 2019. However, frac and flowback operations began, preventing further work at the site. An extension of the original 90 day deadline was granted by the NMOCD to the current deadline of August 1, 2019. The frac and flowback operations were completed in mid-July, 2019. XTO began further site assessment and excavation on July 17, 2019. Final confirmation samples were collected July 29, 2019. Once laboratory analytical results confirm, XTO will submit a remediation work plan or closure report. To provide enough time to review the laboratory analytical results and prepare the remediation work plan or closure report, XTO requests an extension of the deadline until September 1, 2019.

Thanks,

Tacoma Morrissey
