Gustavo,

We have received your closure report and final C-141 for **1RP-4608 Warren McKee Bat**, thank you. This closure is denied.

The OCD won't be able to close a spill with contaminants left in place at sidewall samples NSW-1 and NSW-3. Please resubmit a deferral request with signed/dated pages 3-5 of form C-141. Explain in the deferral request why you were unable to extend/remediate the sidewall sample points. Please resubmit through the payment portal when completed.

Please let me know if you have any further questions.

Thank you,

Robert J Hamlet

OCD approval does not relieve the operator of liability should their operations fail to adequately investigate and remediate contamination that may pose a threat to groundwater, surface water, human health or the environment. In addition, OCD approval does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
