Dump valve on heater treater stuck open, causing water to transfer to oil tank, causing oil to overflow from top of tank.

Describe Area Affected and Cleanup Action Taken.*

Oil spilled inside berm which was wet with heavy rain at the time, and was picked up with a vacuum truck, oil gater was spread on spill, and treatment will continue with 13x13x13 fertilizer. Total loss of oil was 1BB1. , ranking is Depth to ground water-0, wellhead protection-0, distance to surface water-0. BTEX test with PID was negative, TPH with Diox Kit was 30ppm, chlorides were 450ppm. Request closure of this incident.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOC/D rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOC/D marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOC/D acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
