Re: Bar W Fee #2  
2310' FSL & 1650' FWL, Unit K  
Section 10, T-22S, R-27E  
Eddy County, New Mexico

Dear Bryan:

30-015-33587

In reviewing the requirement of an H<sub>2</sub>S contingency plan on the above referenced well we have determined the following: The H<sub>2</sub>S concentration is 25 ppm in the Delaware, therefore no potentially hazardous volume exists. We do not believe that an H<sub>2</sub>S contingency plan is necessary.

If you have questions or need further information, please call.

Sincerely,

Melanie J. Parker  
Land Department

**Subject:** BAR-W FEE #1 & #2

Hi Bryan!

On-line your comments on the Bar-W Fee #1 and #2 ask about the cement on the production casing. My comments should have said that we plan to bring TOC to 200' above all oil and gas bearing zones, not to surface.

Thanks,

Melanie
