13 Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof.

If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond no. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have completed, and the operator has determined that the site is ready for final inspection.)

Yates Petroleum respectfully requests an exception to the Special Drilling Stipulations attached to the APD, section III, other facilities. Due to the potential production of this well, a 500 bbl tank may be needed. These tanks are greater than 8' in height. However; upon this determination a 500 bbl is not required and a low profile is not available for immediate use, Yates requests permission to install their standard 210 bbl tank.
