Latitude _____	Longitude _____	Metes and Bounds _____			

28. Describe Proposed or Completed Operation

Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all markers and zones. Attach the Bond under which the work will be performed or provide the Bond Number on file pertinent with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.

Yates Petroleum Corporation plans to plugback and recompleate this well as follows: Set a 7" CIBP at 7602' with 35' cement on top. Perforate Wolfcamp 5044'-5064'(21) and 5072'-5082'(11) for a total of 32 holes. Stimulate as needed. Set a 7" CIBP at 4994'. Perforate Yeso 1612'-1618'(7), 1654'-1658'(5), 1734'-1746'(13), 1802'-1808'(7), 1850'-1866'(17), 1882'-1892'(11), 1906'-1916'(11), 1936'-1942'(7), 1974'-1976'(3) and 1980'-1984'(5) for a total of 86 holes. Stimulate as needed.

YPC plans to use a Closed Loop System.

There will not be enough H2S anticipated from the surface to the Wolfcamp formation to even meet the OCD's minimum requirements for the submission of a contingency plan per Rule 118.

I hereby certify that the foregoing is true and correct.

29. Name*

TINA _____ HUERTA

30. Title

REG COMPLIANCE SUPERVISOR

31. Date* (MM/DD/YYYY)

12/16/2004
