BOPCO, L.P. respectfully wishes to report upgrades to the Poker Lake Unit 40 battery.

These upgrades will be done in an effort to be proactive in the prevention of spills involving contaminants.

Piping modifications are to be done to allow improved visibility of flowlines, making them more accessible. Dirt work will be done, removing any lingering contaminants in preparation for the impermeable containment. The tanks will be cleaned and coated internally and externally with a modified polymer elastomeric lining material will be retorfitted to assure containment of any spills.
