13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

9 5/8" surface pipe was set at 910' and cemented to surface as set out in drilling permit. After drilling out circulation was lost at 1142' and was regained after pumping LCM but was lost again at 1352'. Repeated attempts were made pumping LCM with no success. The well was then dry drilled to 1473' and plugged back w/200 sx cmt to 1107'. After drilling out cement circulation was again lost at 1162'. Contingency plan is to dry drill to +1950' (top of curve) and set 7" 23# J-55 casing and cement to surface if possible or minimum of 100' inside 9 5/8". Curve and lateral will be drilled as per drilling permit with only change being to run 4 1/2" 11.6# L-80 (instead of the 5 1/2" 17# N-80 on drilling permit) and cementing back to surface.
