Subject: C-144 CLOSURE REPORT: Murchison - Jawbone State cuttings pit
Attachments: CompleteClosureReport_JawboneCuttingsPit.pdf

Mr. Griswold:

On behalf of Murchison Oil and Gas, please find the attached Closure Report/Final C-144 for the **Jawbone State** temporary pit (Pit Permit #2-13-0034) which was closed using in-place burial.

We understand that NMOCD cannot formally release the site until re-vegetation is documented. When the surface is restored to the Pit Rule requirements, we will provide the necessary documentation. We will also continue to monitor the surface for erosional concerns and provide reports to OCD as outlined in the engineered Post Closure Erosion Control Plan submitted with the application.

Thank you.
