Was a Watercourse Reached? ☐ Yes ☒ No						If YES, Volume Impacting the Watercourse. N/A							
If a Watercourse was Impacted, Describe Fully.* N/A													
Describe Cause of Problem and Remedial Action Taken.*													
4" Check Valve froze and broke during the thaw out process. Release was held inside lined berm. Vacuum truck was dispatched to pick up standing fluids.													
Describe Area Affected and Cleanup Action Taken.* An approximate size of 20' v 20' was imported. Palessa was hald inside lined horm. Vacuum truck was dispetched to rick we standing fluids. Benth to													
An approximate size of 20' x 20' was impacted. Release was held inside lined berm. Vacuum truck was dispatched to pick up standing fluids. Depth to Ground Water: >50' (approx. 65', per New Mexico State Engineers office); Wellhead Protection Area: No; Distance to Surface Water Body:													
>1000'; SITE RANKING IS 10. Based on site ground water quality and enclosed analytical results.													
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and													
regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability													
should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health													
or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other													
federal, state, or local laws and/or regulations OIL CONSERVATION DIVISION
