Operator,

A Form C-141 with a remediation proposal for the above referenced well site, has been received by the NMOCD District 2 office. To confirm our conversation during a meeting at the well site on April 14, 2005, the following stipulations apply to the remediation of this well site.

Impacted soils are to be removed and hauled to an NMOCD approved disposal. The initial excavation will remove approximately 4 to 6 inches of soil from the impacted area. After soil removal, samples are to be obtained and submitted to an approved lab for analysis.

A background sample of the playa will also be obtained at this time.

The results of these samples will determine if further excavation is required.

Thank you,

Mike Bratcher

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.*

Propose to remove top soil from affected area, take soil samples. Haul in clean clay to seal area and fill with suitable soil to a level aprox. 12" above normal ground level.

Describe Area Affected and Cleanup Action Taken.*

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
