MOC request to lay buried 2 7/8" steel flowline and 3" SDR 7 poly gas line along Tanner Nygren (BLM) approved route. This route is seen in the attached survey plats. The 2 7/8" steel line will be low pressure & carry wellbore fluids (oil, water, and gas) from the well to the battery. The 3" SDR 7 poly line will be low pressure and will carry dry natural gas from the battery back to the well site for gas lift. Both lines will be buried in the same trench. The construction of this line will be done with only a track hoe. MOC will not blade this the easement. (These lines should be considered on lease due to MOC moving the location of the Battery as per BLM request due to sand dunes). No arch required, this will be in BLM MOA.

Plats attached.
