13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

- Lime Rock Resources contracted Talon/LPE to do reclamation of the plugged and abandoned location, West Red Lake No 69.
- The surface of the location was bladed to prepare for the installation of a liner. Rock and debris were deep buried. A composite 20 millimeter liner measuring 218-feet long by 200-feet wide was installed over the entire location of this plugged site. The edges of the liner were keyed a minimum of 2-3 feet deep into a trench excavated at the boundaries of the location.
- New soil was transported in from a local borrow pit. A minimum of 2-foot of new soil was placed over the top of the 20 mil liner. The soil lift was contoured to match the surrounding terrain and was hand seeded on 5/30/2012 using the recommended BLM seed mixture #3.
- Erosion control berms were installed to prevent washout of the reclaimed area.
