13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

**Complete Well Deviation Report.**

Please find attached a copy of correspondence submitted to the NMOCD to show a full Deviation Report. After review of original filing of BLM final completion forms (3160-4, 3160-5 Well Completion Work, Well Deviation Report, Wellbore Diagram, NMOCD C-104 and Well logs) submitted on June 28, 2005, it was noticed that the included Deviation Report for this well did not adequately cover the entire depth of the well. This 3160-5 with attachments should make up for this deficite in well records and facilitate receiving final completion form approvals. If further information is required, or there are any questions, please contact us at (432) 498-8662.
