RECEIVED

The survey is measured relative to the surface location, and since the surface location is 330' FSL and 2010' FWL, and we went 4422' north and 235' east, the final footage for the BHL would be 4752 FSL and 2245' FWL, or more appropriately, 528' FNL and 2245' FWL.

SO Greg can you help with this. I think the attached is the last plan vs actual plot Josh provided. It does not show footage from lease lines?
