13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleting horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleting in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

BOPCO, L.P. respectfully requests to make the following changes to the above captioned well:

Alter the casing design to the following:

Set 7", 26#, HCP-110, LTC casing at 8,655' which is 50' above KOP. We will cement the aforementioned casing in two stages with a DV tool set at approximately 5,000'. Cement will be circulated to surface.

Run a 4-1/2", 11.6#, HCP-110, LTC open hole completion system to a depth of 15,629'. The top of the completion system will be set 50' inside of the 7", 26#, HCP-110, LTC casing shoe at a depth of 8,605'. Two back to back open hole packers will be utilized to isolate the 2nd Bone Spring Sand formation. Cement not required with open hole completion system.
