Describe Cause of Problem and Remedial Action Taken.*					
A fiberglass fitting came loose. Replaced the fitting a new fitting.					
Describe Area Affected and Cleanup Action Taken.*					
Initially 75bbbls of produced water were released due to a fitting came loose on a fiberglass line. We were able to recover 50bbbls with a vacuum truck. All free fluid has been recovered. The spill was located in the pasture. Tetra Tech will sample the spill site area to delineate any possible contamination from the release and we will present a work plan to the NMOCD/BLM for approval prior to any significant remediation work.					
I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
