13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

A map is enclosed showing the Federal leases and well locations in Section 23, T17S, R27E.

The BLM's interest in these leases is the same. Leases NMNM-025527A and NMNM-025527 have a royalty rate of 12.5%.

Oil & Gas metering:

Oil, gas and water volumes from each well producing to this battery will be determined by using a test separator and test gas meter at the proposed facility so that one well is always producing through the testing equipment. Production will be allocated on a daily basis based on the most recent individual well test of oil, gas and water. Well tests for each well will be conducted at least once per month for a minimum of 24 hours each well. The oil and gas hydrocarbon production from the Yeso Viking Federal wells listed above will be commingled, measured and sold off lease

32. Additional remarks, continued

using the well test method.

A central tank battery will be located at the Yeso Viking Federal #3 in Section 23, T17S, R27E on Federal Lease NMNM-025527A in Eddy County, New Mexico. A common gas sales meter 713301-00 associated with DCP is located in Section 23, T17S, R27E approximately 1500 feet south of the Yeso Viking Federal #3. These meters will be calibrated on a regular basis per API, NMOCD and BLM specifications. The BLM and OCD will be notified of any future changes in the facility. Produced water will be trucked from location initially, and potentially sent to the Yeso SWD in Section 21, T17S, R28E in Eddy County, New Mexico, approximately 5 miles from the Yeso Viking Federal #3 CTB.

Process and Flow Descriptions:

Please see attached diagram for the Yeso Viking Federal #3 CTB. The flow of produced fluids is shown in detail along with a description of each vessel.

The commingling of production is in the interest of conservation and waste and will result in the most effective economic means of producing the reserves in place from the affected wells and will not result in reduced royalty or improper measurement of production. The proposed commingling will reduce operating expenses as well as reduce the surface facility footprint and overall emissions.

OXY USA WTP LP understands the requested approval will not constitute the granting of any

right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per NMOC and BLM regulations.

The working interest, royalty interest and overriding royalty interest owners have been notified of this proposal by certified mail (see attached).

**Commingle on and off lease Sales and Storage for NM025527A and
(NM025527 (off lease measurement, sales and storage)) Per attached list
of wells**

1. This approval is subject to like approval by the New Mexico Oil Conservation Division.
2. This agency shall be notified of any spill or discharge as required by NTL-3A.
3. This agency reserves the right to modify or rescind approval whenever it determines continued use of the approved method may adversely affect the surface or subsurface environments. Also this office reserves the right to modify or rescind approval if it is determined that Instruction Memorandum (IM) No. 2013-152 dated July 3, 2013 and the Pecos District Instruction Memorandum No. NMPO-2013-02 is not being fully adhered.
4. This approval does not constitute right-of-way approval for any off-lease activities. Within 30 days, an application for right-of-way approval must be submitted to the Realty Section if not already done.
5. Approval for combining production from various sources is a privilege which is granted to lessees for the purpose of aiding conservation and extending the economic life of leases. Applicants should be cognizant that failure to operate in accordance with the provisions outlined in the Authorized Officer's conditions of approval and/or subsequent stipulations or modifications will subject such approval to revocation.
6. Approval for off lease measurement, sales and storage production facility is a privilege which is granted to operator for the purpose of allowing production sales on a particular lease and/or for the purpose of aiding conservation and extending the economic life of leases. Applicant should be cognizant that failure to operate in accordance with the provisions outlined in the Authorized Officer's conditions of approval and/or subsequent stipulations or modifications will subject such approval to revocation.
7. All above ground structures on the lease shall be painted Shale Green (5Y 4/2), or as per approved APD stipulations. This is to be done within 90 days, if you have not already done so.
8. Gas measurement for allocation must be measured as per Onshore Order #5 for sales meters.

Yeso Viking Federal Central Tank Battery
Yeso Viking Wells 2 thru 32

9. All gas and oil subject to royalty shall be measured as per federal regulations and shall be reported to ONRR as required. All gas which is vented, flared or used on lease shall be reported as per NTL-4A to ONRR. All gas which is vented or flared shall be subject to royalty, unless prior approval was given by the authorized officer.
10. This agency shall be notified of any change in sales method or location of sales point.
11. Additional wells and/or leases require additional commingling approvals.

The public's interest in all these leases/CAs has been found to be identical at 12.5%. Therefore, this commingle is being approved. This does not mean that the allocation of production to each lease/CAs will be 100% accurate each month. By approving this request it will only guarantee that the public's interest will not be compromised.

A map is enclosed showing the Federal leases and well locations in Section 23, T17S, R27E.

The BLM's interest in these leases is the same. Leases NMNM-025527A and NMNM-025527 have a royalty rate of 12.5%.

Oil & Gas metering:

Oil, gas and water volumes from each well producing to this battery will be determined by using a test separator and test gas meter at the proposed facility so that one well is always producing through the testing equipment. Production will be allocated on a daily basis based on the most recent individual well test of oil, gas and water. Well tests for each well will be conducted at least once per month for a minimum of 24 hours each well. The oil and gas hydrocarbon production from the Yeso Viking Federal wells listed above will be commingled, measured and sold off lease using the well test method.

Well tests for each well will be conducted at least once per month for a minimum of 24 hours each well. The oil and gas hydrocarbon production from the Yeso Viking Federal wells listed above will be commingled, measured and sold off lease using the well test method.

A central tank battery will be located at the Yeso Viking Federal #3 in Section 23, T17S, R27E on Federal Lease NMNM-025527A in Eddy County, New Mexico. A common gas sales meter 713301-00 associated with DCP is located in Section 23, T17S, R27E approximately 1500 feet south of the Yeso Viking Federal #3. These meters will be calibrated on a regular basis per API, NMOCD and BLM specifications. The BLM and OCD will be notified of any future changes in the facility. Produced water will be trucked from location initially, and potentially sent to the Yeso SWD in Section 21, T17S, R28E in Eddy County, New Mexico, approximately 5 miles from the Yeso Viking Federal #3 CTB.

Process and Flow Descriptions:

Please see attached diagram for the Yeso Viking Federal #3 CTB. The flow of produced fluids is shown in detail along with a description of each vessel.

The commingling of production is in the interest of conservation and waste and will result in the most effective economic means of producing the reserves in place from the affected wells and will not result in reduced royalty or improper measurement of production. The proposed commingling will reduce operating expenses as well as reduce the surface facility footprint and overall emissions.

OXY USA WTP LP understands the requested approval will not constitute the granting of any right-of-way or construction rights not granted by the lease instrument. These applications will be submitted separately for approval per NMOCD and BLM regulations.

The working interest, royalty interest and overriding royalty interest owners have been notified of this proposal by certified mail (see attached).
