Describe Cause of Problem and Remedial Action Taken.*

A transfer from cellar to open-top tank and the valve was left open causing 45 bbls of produced water to leak onto the ground. A vacuum truck recovered 20 bbls of produced water and the transfer/valve were closed.

Describe Area Affected and Cleanup Action Taken.*

The affected area is approximately 40' x 45' around the outside of the sub and along the pipe wrangler. Remediation will be completed in accordance with a remediation plan approved by NMOCD and the BLM.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
