NATURE OF RELEASE

Type of Release Spill	Oil	Volume of Release	10bbls	Volume Recovered	10bbls
Source of Release	A 1" line on the suction side of the circulating pump was left open.		Date and Hour of Occurrence	4/2/2015 @ 9:45 PM	
Was Immediate Notice Given?	<input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required		If YES, To Whom?	BLM Jim Amos	
By Whom?	David Simmons		Date and Hour	4/3/2015 @ 2:40 AM	
Was a Watercourse Reached?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		If YES, Volume Impacting the Watercourse		

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Lease Operator went out to the Coral PWU 28 #4H location a found a 10 bbl oil spill inside the containment. There was a 30x30 fine mist over spray into the pasture on the South, Southeast side of the tanks. Lease Operator walked around the battery to locate where the oil was coming from, and found that the 1" line on the suction side of the circulating pump was left open. The line is used to drain the pot that catches the fluid when priming the circulating pump. It was found that when the pump would shut off, the gravity would push the fluid into the pot and out in to the containment and it was determined that the cause of the over spray was that with the high wind today it must have carried some of the oil out to the pasture. Containment was checked for holes none were found.

Describe Area Affected and Cleanup Action Taken.\*

The 1" valve was closed and Basic Trucking recovered all 10 bbls from containment but 30x30 fine mist was not recovered.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
