If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*  
Oil tank overflowed because oil did not equalize at the same rate as it was being produced. This problem has been corrected.

Describe Area Affected and Cleanup Action Taken.\*  
Initially we released 15bbls out of the oil tank and into the lined facility. All released oil was contained inside the firewalls. The tank battery has been cleaned, the contaminated gravel has been removed, and fresh gravel has been added to the tank battery. (The closest well location to the tank battery is the GJ West Coop # 210, Unit C, Sec.16-T17S-R29E, 990 FNL 1650 FWL, Eddy County, NM, 32.8391 - 104.08307, API# 30-015-36703)

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
