13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The plats provided with the SUPO document for the proposed WI Federal #26 well indicated the 30'X250' topsoil area was to be located adjacent to the southern boundary of the Permanent Disturbed Area for the well.

EPNG plans on relocating the 30'X250' topsoil storage area to due south and adjacent to the 350'X350' Interim Reclamation Area for the well as recommended in a July 2, 2014 email from Jesse Rice and shown on the attached plat.

In an email dated 05/13/15, Cody Layton granted permission to proceed with construction and requested the submission of this followup sundry notice.

Lease NM- 22207  
API #: 30-015-42684

Dear Sir/Madam:

Enclosed are triplicate copies of a completed BLM Form 3160-5 (Sundry Notice) to document the relocation of the topsoil storage area for the proposed WI Federal #26 well.

If you have any questions or require additional information, please call me at 719-520-4557.

Sincerely,

Anthony P. Trinko  
Sr. Reservoir Engineer  
Gas Storage Engineering  
El Paso Natural Gas Company, L.L.C.
