13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

This well is an infill well and the 5th well we have drilled in the immediate area in this field. We have not taken gas kicks or had any situation that required well control procedures. We hereby request a waiver of the requirement to rigup a hydraulic remote controlled choke. The rig we are using does not have this equipment and we feel that renting and installing this would be an unnecessary expense. All BOPE on the rig is rated to 5000 psi (except the annular) which is rated to 3000. We will have flow monitors and pit volume totalizers rigged up before drilling into the Wolfcamp.
