Additional Comments: Will transfer any solids from reserve pit to drilling pit. If Necessary to lower Drilling pit to encapsulate all materials 3ft below grade will line 12Mil

Transfer all solids from reserve to relined encapsulation pit a 20mil synthetic liner will be placed over contents, with a min of 3 ft overlap

Additional Comments: Mixed to stiffen contents. Encapsulation trench will be excavated and lined with 12mil synthetic liner on former drilling site. Drilling pit contents will then be placed into encapsulation pit capped with 20mil synthetic liner with 3 ft over lap, backfilled encapsulation pit to grade using 3ft clean soil or like material.
