Describe Cause of Problem and Remedial Action Taken.*
Two oil tanks had holes due to corrosion on bottom causing a 65 bbls oil release. Vac truck was called to transfer 60 bbls oil to third oil tank to prevent further release. Tanks will be repaired when possible.

Describe Area Affected and Cleanup Action Taken.*
65 bbls oil was released on the East side of the facility. 60 bbls oil were recovered via vacuum truck. All fluid remained on the pad inside unlined containment. Environmental Agency will be called for remediation.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
