Hi Tony,

Read & Stevens, Inc. corrected the violation on the Turkey Track State Com #1 on July 25, 2016.

Picked up all old tubing and dug out stained dirt from around wellhead. Disconnected old separator that was not in service and loaded it up on trailer and cement blocks and hauled off. Disconnected lines from production separator to oil storage tank that were not in use and hauled off. Built containment around 300 bbl. oil storage tank. Also built containment around 2 phase separator. Load up contaminated soil from around wellhead and fill in with clean caliche. Location ready for inspection at report time.

Thank you Tony!

Attachment: 2 photos of location
