13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

Please see attached plats to revise the SHL from 421' FSL & 130' FWL to 391' FSL & 260' FWL. Net move is 133' SE. Also attached are the updated drill rig layout/H2S diagram, and production facility/interim reclamation diagram.

There is no change in pad size or location. SHL has moved within previously approved footprint. There is no change in BHL.

Change in SHL more efficiently uses the pad space, more safely coordinates future operations with the directly adjacent Stebbins 19 Fed slot 4 pad to the west, and revises SHLs to fit Matador's rig.
