### Summary of Changes to APD Submission

Chevron respectfully request the ability to cement offline on the HH SO 8 P2 (5H,6H,13H,14H,21H,22H). The summary provided below is a brief description of the main operational sequences for drilling run casing, and cement offline the four wells listed above.

Move rig to first well in the Drill Order.

Drill order for HH SO 8 P2 (5H,6H,13H,14H,21H,22H).)

|                     |     |   |             |     | HH   | SO 8 | P2 fro      | m S t | o N        |      |   |     |    |     |         |

#### Sequencing by hole section.

- Surface Hole:
  - 1. Drill 17-1/2" surface hole with fresh water to planned casing set depth with 10' rat hole.
  - 2. Run casing as stated by approved APD, land out wellhead.
  - 3. Move the rig to next well (~2-3 hours) and cement previous well offline.
    - All sacks and volumes will remain the same.
  - 4. Dress out 13-5/8" 5M SH-2 wellhead and install/secure with temporary abandonment cap, and a pressure gauge will be installed.
  - 5. Skid to next well according to above "Drill Order"

Repeat 1 through 3 until all three surface holes are drilled, cased and cemented offline.

- Intermediate Hole:
  - 1. N/U, using an API approved Quick-Connect, and test 13-5/8" 5M Class IV BOP to 250 psi / 5,000 psi.
  - 2. Test casing to required pressure. Drill out shoe track and 10' of new formation. Perform FIT. Drill 12-1/4" intermediate hole to planned casing set depth with ~10' of rat hole.
  - 3. Run casing as stated by approved APD, land out hanger and cement offline.

Repeat 1 through 3 until all three intermediate holes are drilled, cased and cemented offline.

#### Production Hole:

- 1. Test casing to required pressure. Drill out shoe track and 10' of new formation. Perform FIT. Drill 8-1/2" vertical section, curve, and lateral as stated by approved APD.
- 2. Run casing as stated by approved APD, land out hanger and cement offline.

- All sacks and volumes will remain the same.
- 3. Install back pressure valve and temporary abandonment cap.

Repeat steps in production hole until all wells are drilled, cased, and cemented offline.

## **Changes Summary**

**Summary:** Variance to cement offline the Hayhurst pad not requested in original submittal. We will not abandon (move the rig off of the pad) the well without cementing and securing the well.

| As Defined in APD:                        | As Planned on Well:   |  |  |  |  |
|---|---|--|--|--|--|
| Variance to cement offline not requested. | Chevron respectfully request the ability to cement offline on the HH SO 8 P2 (5H,6H,13H,14H,21H,22H).) The summary provided is a brief description of the main operational sequences for drilling, casing and cementing the wells listed above. |  |  |  |  |
