### LEGEND

	Valve Open		Turbine/ Coriolis Meter
	Valve Closed		Oil
	Valve Sealed		Gas
	Orifice Meter		Water

### FACILITY DIAGRAM

Shown: Major equipment, vessels, process piping, and valves  
Not shown: Auxiliary process systems such as fuel pilot gas system, gas lift system, roll lines, recirculating lines, vent lines, and small drain lines  
PRODUCTION PHASE: All valves that provide access to production are effectively sealed in the closed position.  
SALES THROUGH LACT UNITS: Sale is measured through LACT units. All other valves that provide access to production (load-out valves) are effectively sealed in the closed position.  
WATER TANKS: If the possibility for oil to enter water tanks exists through common recirculating or equalizing lines, oil tanks are isolated from water tanks by valves effectively sealed in the closed position.

Facility Overview: Please see pages 2 and 3 for details.
