13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomplete horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.

BLM inspection found oil inventories in the field at the Phillips KN Com Battery did not match the OGORS. Oil was moved from the oil tank to the water tank while work was being done to repair the oil tank. When inventories were moved back, the inventory still did not match because free water was not subtracted from the total oil volume.

We were advised by ONRR to adjust the inventories to appropriately reflect what was out in the field using code 08 on the OGOR and pay the royalties for the difference.

Mr. ~~Hughes~~ ^{Harrison} requested for this sundry to be done.
