Re: Caza-Mad River 13 State Com #3H Well
Caza-Mad River 13 State Com #4H Well
Caza-Mad River 13 State Com #6H Well
Section 13, T24S-R27E
Eddy County, New Mexico

Gentlemen:

Prior to the promulgation of the Purple Sage Wolfcamp Field Rules, Caza drilled its Mad River 13 State Com #3H well on a project area consisting of the S/2S/2 of Section 13, T24S-R27E, Eddy County, New Mexico, (160 acres) and its Mad River 13 State Com #4H well on a project area consisting of the N/2S/2 of Section 13 (160 acres). After the Purple Sage Wolfcamp Field Rules were promulgated, Caza drilled its Mad River 13 State Com #6H well on a project area consisting of the S/2 of Section 13 (320 acres). I understand that pursuant to the Purple Sage Rules, an operator, at its option, may amend the units for existing wells on spacing less than 320 acres to the new 320 acre spacing. Caza has made such filings for its 3H and 4H wells so that all three wells are on the same spacing and unit area. As we discussed on the phone recently, all well interests in the S/2S/2, N/2S/2 and S/2 of Section 13 are the same due to the configuration of each of the leases.

Should you need any further information, please do not hesitate to call me at 832-381-3854. Thank you for your cooperation and assistance.

Very truly yours,
CAZA PETROLEUM, LLC

Subject: FW: Mad River Wells

Mike,

As we discussed this afternoon, prior to the OCD formation of the Purple Sage Field spacing rules, Caza drilled 2 wells on its Mad River prospect in the S/2 Section 13, T24S-R27E, Eddy County, NM. The Mad River 3H and 4H wells were permitted and drilled on 160 units, being the N/2 S/2 and S/2 S/2 of Section 13. Then, pursuant to the promulgation of the Purple Sage Field rules, Caza permitted and drilled the 6H well on the 320 acre S/2 unit. It is Caza's understanding that, at the operator's choice, the size of smaller units may be changed to the Purple Sage 320 acre size unit (from 160 acre to 320 acre units). It is my understanding that Caza has previously filed paperwork with the OCD to make this change to 320 acre units for the 3H and 4H wells. I understand from the SLO that this change is necessary since all wells are completed in the Wolfcamp formation and need to be under the same communitization agreement and PUN.

Due to the regular configuration of the leases within the S/2, all interested parties have the same respective interests in each of the 160 and the 320 acre units, therefore, no party in the units is "affected" by the unit spacing change. If you need any further information, please do not hesitate to let me know.
