ATTN: Environmental Department

June 9, 2006

Reference: Hoss BHK State 001 I-2-25s-28e API: 30-015-28002

Operator,

A New Mexico Oil Conservation Division Deputy Inspector made an inspection at the above referenced well site on June 7, 2006. The Inspector observed what appears to be a large area of chloride impacted soils possibly originating at a pit on location. Attached to this correspondence is a photo sheet with photos of observations made.

At this time the New Mexico Oil Conservation Division District 2 Office (OCD) is requesting the following:

- Provide information regarding what appears to be a release of produced fluids at this site.
- Submit a form C-141 if required.
- Submit a copy of pit approval/registration for the pit at this site.

Please provide this information no later than June 23, 2006.

If I can be of assistance in this matter, please contact me.

Sincerely,

A handwritten signature in black ink, appearing to read "Mike Bratcher".
