**RE: Chesapeake Operating, Inc. – Deep Burial Closure Request
Tyrell 13 Federal Well #4
Section 11, T10S, R25E, UL: A
Chaves County, NM**

Dear Mr. Barton:

On behalf of Chesapeake Operating, Inc. (Chesapeake), BBC International, Inc. (BBC) respectfully requests to utilize a deep burial trench lined with 20 mil plastic, a 20 mil plastic cap, and three (3) feet of top soil for the closure of the reserve pits located at the above referenced well site.

A water well search of the USGS and State Engineer Office (SEO) online web sites did not locate any water wells in the section in which the well is located. A larger search was conducted for surrounding sections and the adjoining township and range. One water well was located in the adjoining section to the northwest, Section 11, T10S, R25E using the SEO database. The average depth of this well is 158 feet below ground surface. The RA number for this well is 04837. This well is located approximately one mile to the east of the oil well site (see attached diagram and SEO print out).

A ranch house that is approximately two (2) miles north northeast of the well location has a domestic water well with an approximate average depth of 35 feet according to the home owner. However, the Tyrell 13 Federal Well #4 location is located on a hill that is approximately 100 feet higher in elevation according to the GPS instrument used in the search. In addition, the rancher has a windmill located approximately ½ mile south southeast of his house and the depth to water there is approximately 70 feet according to him. The windmill is also lower in elevation by approximately the same 100 feet to the Chesapeake well.

Therefore, utilizing this information, Chesapeake submits this C-103 for approval utilizing deep burial as the method for closure. Thank you for your consideration.

Sincerely,

Cliff P. Brunson, CEI, CRS
President
