30-015-01733

Gerry,

BP has decided to P&A the EAU F-38 and approval has been received by the OCD to perform this operation. BP is currently in the process of gaining redline approval from the Houston BP office and co-owners approval. This approval process will take at least 30-45 days. After which, the well will be assigned to a rig for the P&A operation. This entire process from start to finish will exceed the February 12th deadline, but BP wants to assure you that we are taking the necessary steps to bring the EAU F-38 back into compliance. Please call with any questions.

Thanks,

*Kristle L. McBride*
