13. Describe Proposed or Completed Operation (clearly state all pertinent details, included estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The Ozley 25 Federal No. 1 is currently producing 0 BO and 5 mcf per day from the Chosa Draw; Morrow zone. Cimarex intends to re-enter, set a CIBP @ 10500' w/ 35' cmt, and perforate and stimulate as follows:

Perf Cisco Canyon 9963'-10200.' Frac with plan devised at time of operation.  
Perf Wolfcamp 9005'-9062', 9187'-9269', & 9292'-9442.' Frac with plan devised at time of operation.

Cimarex would then like to DHC the Cisco-Canyon and Wolfcamp. However, we are requesting permission to run a production log to establish each zone's production rates instead of running well tests because of the Cisco-Canyon's sensitivity to being shut-in.

Please see attached C-102s.
