Hi Jerry,

Please be advised that the above noted well is non-standard at the bottom hole location and will need a NSL.
(671' FNL & 1994' FEL)

With the calculations I have, the distance from the west boundary of the proration unit is 646' or 14' off from being standard.
If you have applied or have an application, please disregard this e mail.
Also, the pool that I am to place it in will be the Rio Pensaco; Wolfcamp Gas Pool.

Please call if you have any questions,
Visit w/you later,
Bryan
748-1283 ext. 103
