Mewbourne Oil Company

P.O. Box 5270

Hobbs, NM 88241

Attn: Monty Whetstone or To Whom It May Concern:

Dear Mr. Whetstone or To Whom It May Concern:

RE: **Mewbourne Oil Company's: Application to drill (APD) for the Hackberry Hills 31 State #1** ✓
Surface location in Unit P, of Section 31, Township 21 South, Range 26 East, Eddy County, New Mexico,
NMPM. API # 30-015-35661
Mewbourne Oil Company's: Application to drill (APD) for the Hackberry Hills 31 State #2
Surface location in Unit M, of Section 31, Township 21 South, Range 26 East, Eddy County, New Mexico,
NMPM. API # 30-015-35408

In reference to the above noted APDs, the New Mexico Oil Conservation Division (NMOCD) will require (in part) that drilling mud samples from the flow line be sampled every 100' in order to determine chloride levels during the drilling of the Capitan Reef section of the well bore. Results are to be submitted to our office before drilling to total depth of the well bore. Please note that the Capitan Reef section is to be drilled with a fresh water mud. Please call me if you have any questions about this matter.

Respectfully yours,

Bryan G. Arrant

NMOCD's District II Geologist
