13. Describe Proposed or Completed Operation (clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleation in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all requirements, including reclamation, have been completed, and the operator has determined that the final site is ready for final inspection.)

Pressure test the annulus between the 7" and 9-5/8" casing stings. The pressure test will be 500 psig, held for 30 minutes and recorded on a chart. BLM will witness the test. A successful test will fulfill the requirements under the incident of non-compliance and no perforation and circulation of cement at +/- 2400' will be required as agreed to today by OXY and the Carlsbad, NM-BLM. The casing and cementing history will be reviewed upon final abandonment of the well.
