COMMENCE DRILLING OPNS. ☐ P AND A ☐  
CASING/CEMENT JOB ☐

OTHER ☐

13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

Devon Energy Production Company, LP, respectfully requests approval to downhole commingle the Red Lake Queen-Grayburg-San Andres (51300) and the Northeast Red Lake-Glorieta Yeso (96836) pursuant to 19.15.5.303 (C) 3 (b) Exceptions for wells located in pre-approved pools or areas.

This pool was pre-approved by Division order PC-1108.

The San Andres is perforated at 1755-2260' and the Yeso is perforated from 2859-3111'.

Average production from the SA is 12.5 oil and 21 gas. Average production from the Yeso is 13 oil and 28 gas.

The allocation method is by ratio of stabilized production. For the Yeso, oil is 51.0% and gas is 57.1%.

For the San Andres formation, oil is 49.0% and gas is 42.9%.

Commingleing these two pools will not reduce the value of the total remaining production and the ownership between the two pools is identical.

I hereby certify that the information above is true and complete to the best of my knowledge and belief. I further certify that any pit or below-grade tank has been/will be constructed or closed according to NMOCD guidelines ☐, a general permit ☐ or an (attached) alternative OCD-approved plan ☐.
