13. Describe Proposed or Completed Operation. Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleat horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompleat in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

6-19-07 J.C. Williamson requests that the well location and acreage dedication plat on file that was submitted with the APD be replaced with a corrected plat with regard to the elevation. After the logging operation on the Ross Draw, the staff geologist pointed out that the elevation on the plat was incorrect that was surveyed by John West Surveying and documented as 3221' rather than 3021'. Please accept the attached plat for file record to show correct elevation 93021' of the area of this well.
