Attn: Mr. Scott St. John

RE: Injection Pressure Increase
Russell USA Well No. 60
Eddy County, New Mexico

Dear Mr. St. John:

Reference is made to your request dated June 22, 2007, to increase the surface injection pressure on the Russell USA Well No. 60. This request is based on a step rate injection test that was conducted on the well on June 6, 2007. The step rate test data shows that approval of the request will not result in the fracturing of the injection formation and confining strata.

You are therefore authorized to increase the surface injection pressure on the following well:

<i>Well Name & Number</i>	<i>Maximum Surface Injection Pressure</i>
Russell USA Well No. 60 API No. <u>30-015-10420</u> Unit F, Section 13, Township 20 South, Range 28 East, Eddy County, New Mexico	420 PSIG

The Division Director may rescind this injection pressure increase if it becomes apparent that the injected fluid is not being confined to the injection zone or is endangering any fresh water aquifers.

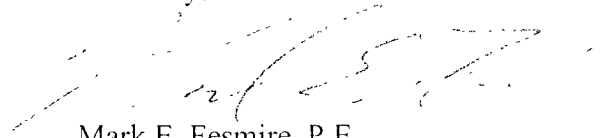

Administrative Order IPI-283

Apollo Energy, L.P.
