NATURE OF RELEASE

Type of Release Oil and Produced Water	Volume of Release 5BO, 170 BW	Volume Recovered <input type="checkbox"/> 4 BO, 150 BW
Source of Release Water tank overflowed	Date and Hour of Occurrence During the night of 12-5-07	Date and Hour of Discovery <input type="checkbox"/> December 6, 2007 - 9:00 AM
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher - OCD -626-0857	
By Whom? <input type="checkbox"/> Jerry Chaney	Date and Hour <input type="checkbox"/> December 6, 2007 10:44 AM	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

N/A

Describe Cause of Problem and Remedial Action Taken.*

Callout system failed causing water tank to overflow. Water was contained in the dike, called out vacuum truck to pick up liquids, and make sure the alert system is working.

Describe Area Affected and Cleanup Action Taken.*

50'x 50' area - picked up liquids with vacuum truck. Will run soil sample when the weather clears up, and til and fertilize and re-run sample in two weeks.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.

***Conditions of Approval
Remediation Work Plan***

Soils/wastes within and beneath the area of the leak, spill or release should be evaluated to determine the type and extent of contamination at the site. In order to assess the level of contamination, observations should be made of the soils at the surface and samples of the impacted soils should be taken in the leak, spill or release area. Observations should note whether previous leaks, spills or releases have occurred at the site. Additional samples may be required to completely define the lateral and vertical extent of contamination. Soil samples should be obtained according to the sampling procedures in Sections V.A. and V.B. This may be accomplished using a backhoe, drill rig, hand auger, shovel or other means.

Samples taken must be approved by OCD prior to authorizing any back fill of the area.
