Latitude 32° 13' 10.30" Longitude 103° 58' 40.24"

NATURE OF RELEASE

Type of Release: Condensate	Volume of Release: 50 bbls	Volume Recovered: 10 bbls
Source of Release: Hole in bottom of steel tank	Date and Hour of Occurrence	Date and Hour of Discovery
Was Immediate Notice Given? <input checked="" type="checkbox"/> Yes <input type="checkbox"/> No <input type="checkbox"/> Not Required	If YES, To Whom? Mike Bratcher - NMOCD; Jim Amos - BLM	
By Whom? Kelton Beaird	Date and Hour	
Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.\*

Describe Cause of Problem and Remedial Action Taken.\*

Describe Area Affected and Cleanup Action Taken.\* Spill from hole in tank inside battery. The spill was contained inside the berm. A limited soil assessment was conducted to determine area of impact. Following soil sampling and analysis a work plan was prepared detailing the limited soil assessment activities as well as outlining the proposed remedial activities. Following OCD approval, remedial excavation activities were initiated in the north section of the tank battery. Approximately 131 yards of petroleum hydrocarbon affected soil was excavated and disposed of at the Lea Land Inc landfill. Confirmation soil samples confirmed BTEX and TPH concentrations below action levels of 100 mg/kg for TPH, 10 mg/kg for Benzene, and 100 mg/kg for BTEX. Following OCD notification of results and subsequent approval, the excavation was backfilled with soil obtained from an off-site source. No additional soil cover was placed due to the continued use of the site as an active tank battery. All site remedial activities are documented in the Site Closure Report, dated March 18, 2009 prepared by Talon/LPE on behalf of Oxy USA.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
