13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Chi Operating, is planning to recompleat uphole in the Yates formation (Undesignated).

Yates formation is found at the approx. depths of 2240-2430' subsurface.

This recompenetion is all pursuant to Division Rule NMAC 19.15.15.13 approval for unorthodox oil well location.

Procedure attached.

See attached, Rejected 11/19/09

14. I hereby certify that the foregoing is true and correct

Conditions**

Operator has not provided any additional information that will enable this plug back operation to be approved.

An e-mail was sent to Pam Corbett regarding the plug back operation in August 2008 with the statement that a salt protection string was not set as required by the R-111-P Potash Order. The lack of this salt protection string will have to be resolved with the BLM and NMOCD. This has not been resolved as of 11/19/2009.

As a result, this plug back procedure is being rejected at this time.
