Section 14-T8S-R26E

Chaves County, New Mexico

This well was originally drilled by Dekalb Agricultural Association as the Joan Duke #1 in November 1954, and was plugged and abandoned in December 1954

Yates Petroleum Corporation plans to re-enter the well with a pulling unit and a reverse unit to drill out the cement plugs in the 8 5/8" casing and the 7 7/8" open hole to 6,458'. The mud to be used will be 9.2 – 9.5 ppg brine water, 55-70 viscosity. After circulating the hole clean a new suite of open hole logs will be run, then a string of 5 1/2" casing will be run to TD. The well will be completed with a pulling unit. Possible formation to be completed will be the Silurian, the Cisco, the Wolfcamp, the Abo and the San Andres.

MUD PROGRAM: Mud to be used is 9.2 – 9.5 ppg brine water, 55-70 viscosity.

BOPE PROGRAM: 3000# BOPE will be installed on the 8 5/8" casing and tested daily.
