13. Describe Proposed or Completed Operation: Clearly state all pertinent details, including estimated starting date of any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recompleate horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports must be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recompletion in a new interval, a Form 3160-4 must be filed once testing has been completed. Final Abandonment Notices must be filed only after all requirements, including reclamation, have been completed and the operator has determined that the site is ready for final inspection.)

The original ADP was for 3 casing strings; 13 3/8", 9 5/8" and 7". The casing design was sundried for 13 3/8" and 9 5/8". The BOP stack was not sundried to accommodate the design change. This sundry is for the purpose of changing the BOP application from 5K to 2K on the 13 3/8" casing. A 3K annular preventer will be installed on the 13 3/8" casing to drill the 12 1/4" hole.
