13. Describe proposed or completed operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work). SEE RULE 1103. For Multiple Completions: Attach wellbore diagram of proposed completion or recompletion.

XTO as operator of subject well plans in a very timely manner to convert well to a SWD utility well in the Bell Canyon interval (3450'-3958'). This wellbore offers no further production potential and converting of subject well to an SWD would allow for disposal of produced water from offset development. XTO plans to proceed ahead with partner & regulatory approval ASAP. Implementation timing of said project is dependent on these issues. Tentative timeline will be to submit the required paperwork by the end of June 2010 to the OCD to attempt to obtain administrative approval. Once administrative approval is obtained, then implementation of said project will occur in a timely matter to meet the 90 day timeline. The CIBP is set at 7009'.
