In response to questions asked under Section II B of Bulletin NTL-6, the following information is provided for your consideration:

Location:

330 FSL & 1650 FWL

Elevation above sea level:

3645' GR

Proposed drilling depth:

6000'

Proposed Mud Circulating System:

Depth			Mud Wt Viso		Fluid Loss	Type Mud	
0,	to	450'	8.4 - 8.6	28	NC	FW	
0'	to	1100'	10.0	30-32	NC	Brine water	
0',	to	6000'	8.4 - 9.5	30-32	NC	FW, brine	

Sufficient mud materials will be kept on location at all times in order to combat lost circulation or unexpected kicks. In order to run DSTs, open hole logs, and casing, the viscosity and water loss may have to be adjusted in order to meet these needs.

Fresh water zones will be protected by setting 11½" casing at 450' and cementing to surface. Hydrocarbon zones will be protected by setting 8%" casing at 1100' and cementing to surface, and by setting 5%" casing at 6000' and cementing to 900.'

Pressure control Equipment:

An 11¾" 3000 PSI working pressure B.O.P. consisting of a one set of blind rams and one set of pipe rams and a 3000 psi annular-type preventor. A choke manifold and 120 gallon accumulator with floor and remote operating stations and auxiliary power system. A kelly cock will be installed and maintained in operable condition and a drill string safety valve in the open position will be available on the rig floor. Test BOP equipment and choke manifold to 250 psi low and 3000 psi high and annular BOP to 250 psi low and 1500 psi high by an independent service company.

BOP unit will be hydraulically operated. Below intermediate casing shoe, BOP will be operated at least once a day while drilling and the blind rams will be operated when out of hole during trips. No abnormal pressure or temperature is expected while drilling. From the base of the surface pipe through the running of production casing, the well will be equipped with a 3000 psi BOP system.

BOPS will be tested by an independent service company to 250 psi low and 3000 psi high. Hydril will be tested to 250 psi low and 1500 psi high.
