Describe Cause of Problem and Remedial Action Taken.*

NMOCD ARTESIA

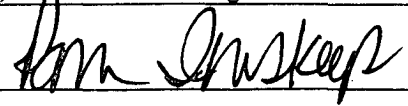

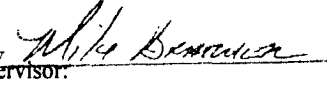

BTA was made aware, 12/09/2010, of a Letter of Violation - Inspection dated 04/06/2006 detailing evidence of a recent release of produced fluids. Ben Grimes, BTA, has spoken with Randy Dade, OCD Artesia, regarding how this needs to be handled. BTA has no record of receipt of the Letter of Violation and no internal report regarding a release at this site. BTA personnel associated with the site at that date (operations manager, field supervisor, pumper) are no longer with the company. Clay Tipton, BTA, has scheduled to meet Mike Bratcher, OCD, at the site on 12/16/2010 to discuss OCD recommendation for remediation. We anticipate that samples will be taken at the site to determine contamination level. If necessary, contaminated soil will be removed and hauled to an approved disposal site. Where it may be possible, affected soil will be blended on-site with clean soil.

Remediation operations will be reported to OCD, Artesia, once completed.

Describe Area Affected and Cleanup Action Taken.*

See above explanation

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
