Was a Watercourse Reached? <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	If YES, Volume Impacting the Watercourse.	

If a Watercourse was Impacted, Describe Fully.*

Describe Cause of Problem and Remedial Action Taken.* The produced water tank overflowed due to a pump malfunction. The main water transfer pump failed to come. The pump was re-set.

Describe Area Affected and Cleanup Action Taken.* The released fluid affected an area of approximately 6700 sq. ft inside the earthen containment around the tanks. The free standing fluids were removed. An area inside the containment area was sampled on 5/24/10 to a depth of approximately 80 ft. Below ground surface, samples were collected at 5 ft. intervals and sampled for TPH, BTEX and Chlorides. Estimated depth to water is thought to be greater than 200 ft. A remediation plan along with a new containment plan will be submitted.
The Site remediation for the produced water and crude oil spill will follow the NMOCD guidelines for leaks and spills.

I hereby certify that the information given above is true and complete to the best of my knowledge and understand that pursuant to NMOCD rules and regulations all operators are required to report and/or file certain release notifications and perform corrective actions for releases which may endanger public health or the environment. The acceptance of a C-141 report by the NMOCD marked as "Final Report" does not relieve the operator of liability should their operations have failed to adequately investigate and remediate contamination that pose a threat to ground water, surface water, human health or the environment. In addition, NMOCD acceptance of a C-141 report does not relieve the operator of responsibility for compliance with any other federal, state, or local laws and/or regulations.
